32 kanal U 600 Anlage Luthmann Stockholm / Schweden

NE 600 receivers as a 32 channel system in the TV channels 62-64 and 69. Built into 2 flightcases, 20 HU, depth: 500 mm. The flightcases have active ventilation panels on both sides. The wiring of the power system is made via 2 pcs of power outlet panels with 11 connections each. The antenna splitting is made via 7 active and 1 passive ZAS 600 antenna splitters, each of them has 2 passive ZAS 2-1 UHF. A ZCI 600 computer interface, which will be operated via the 32 channel Master / Client Software, will be built into each flightcase. **The PC must have a network card. To install this card, please look to the extra description into the manual of ZCI 600. If there is no network set up, the network card must have a T-adaptor. Both sides of the T-adaptor must have a 50 Ohms terminating resistors**. (Backpacked within the manuels and PC disks)
